

Release Notes: Terracotta Server 4.3.0 Open Source

Terracotta Server 4.3 is the latest release of Open Source edition of the Terracotta Server. It includes Ehcache 2.10.0

- [New Features](#)
- [Known Issues in 4.3.0](#)

New Features

Terracotta Server 4.3 includes the following capabilities

1. Distributed storage (limited: 1 server stripe – active with optional mirror, unlimited client nodes)
2. Key/Value Offheap (basic RAM storage)
3. Support for Java 8
4. Support for RedHat EL7 (server)

Known Issues in 4.3.0

- 4984 - Port 9520 is no longer valid. Actual IP address will show versus the loopback one.
- 5557 - When large number of clients simultaneously connect with the TSA server it could result in NullPointerException and server gets terminated.
- 5737 - Error message when trying to start servers in active-active mode does not give meaningful information.
